## SUMMARY

Results-driven UI Engineer with 6 years of experience at Pegasystems & Wipro, specializing in ReactJS, Angular, Python, JavaScript, TypeScript, and NextJS. Proven track record in developing reusable code libraries, saving development time across projects, and creating visually appealing user interfaces under tight deadlines. Adept at analyzing and improving team designs, integrating in-built APIs, and leveraging industry trends for product enhancement.

---

## EXPERIENCE

### UI Engineer

#### Pegasystems

June 2021 - Present, Hyderabad

- Developed reusable codes and libraries for future use, streamlining the development process. Saving around 4-5 hours of work on every new project.
- Developed visually appealing user interfaces based on customer specifications within tight deadlines.
- Ensured adherence to design principles by analyzing and adjusting UI created by team members.
- Implemented ReactJS and Angular applications employing built-in APIs, optimizing performance and usability.
- Stayed informed about emerging technologies and industry trends through attending conferences and workshops; utilized this knowledge for ongoing improvement of existing products & services.
- Designed and implemented user interfaces for a suite of applications, improving user engagement by 30% through the use of modern frameworks like React and Angular, while ensuring compatibility across all major browsers..

### Project Engineer

#### Wipro

May 2018 - May 2021, Bengaluru

- Reduced the loading time of multi-tab pages by 20%, using dynamic loading algorithms.
- Spearheading CI/CD implementation in a project of 60 members.
- Worked on proprietary tools using javascript to build solutions for Finance companies like UBS.
- Writing test cases for various scenarios before development and regression test cases after development.
- Managing and co-ordinating development tasks with a Business Analyst and a team of 6 developers.

---

## PROJECTS

### YelpCamp

- Let user review available camp sites.
- Stack used- ExpressJs, MongoDB, NodeJS, Bootstrap.
- PassportJS used for authentication.
- User can add new sites, comment and give ratings on existing ones.

---

## EDUCATION

### Bachelor of Engineering

Government College of Engineering · Karad, Maharashtra · 2018

---
